Resume

I'm a **Front-End Software Engineer** with strong experience building responsive, user-centric web applications. While my primary background is in **Vue.js** and **Nuxt.js**, I've also shipped production-grade applications using **React**, **Next.js**, **TypeScript**, **Tailwind CSS**, **Node.js**, and **Firebase** bringing polished, intuitive UI experiences to life.

I've contributed to **impactful products** at companies like Blip and Stilingue, working closely with design, product, and backend teams in agile environments. I'm passionate about **clean architecture**, **mobile-first** design, and crafting seamless interfaces that feel great to use. I value fast **feedback cycles**, design precision, and writing **maintainable code that scales**.

I'm especially drawn to creative tools and **empowering user experiences**, building for builders. I believe **performance**, **usability**, and **aesthetics** all play a critical role in creating magical interfaces.

Work History

Software Engineer

Blip, Ouro Preto, Brazil — Jan 2023 – Apr 2025

Leading company in digital communication and messaging automation, including WhatsApp and other platforms.

- Contributed to the modernization of the company's main legacy system.
- Refactored legacy components into Vue.js, fixing memory leaks and significantly improving performance and load times.

- Removed over 20 obsolete feature flags, optimizing the codebase and improving maintainability.
- Implemented Google reCAPTCHA in the login flow to strengthen security against automated attacks.
- Participated in the migration of routes from Python 2 to Python 3, ensuring system continuity and modernization.
- Built a generative AI solution for extracting insights from social networks, reducing analysts' manual effort.

Technologies & Tools: Vue.js | JavaScript | jQuery | Handlebars | HTML | CSS | Python | GCP | reCAPTCHA | Git | CI/CD | Design System | Code Refactoring | Web Performance | Security | Generative AI

Junior Front-End Developer

Stilingue, Ouro Preto, Brazil — Feb 2022 – Jan 2023

AI-driven platform for social media monitoring and digital customer experience.

- Created a global filters system that improved dashboard usability and reduced churn among strategic accounts.
- Developed over 70 reusable UI components in a single quarter, accelerating the product team's velocity.
- Built a component generator that allowed users to autonomously customize dashboards.
- Automated dashboard updates using Firebase, ensuring data consistency with newly added components.

Technologies & Tools: Vue.js | Firebase | JavaScript | Jest | HTML | CSS | Design System | Componentization | UX | Automated Testing | Reactivity | Data Management

Front-End Development Assistant

Stilingue, Ouro Preto, Brazil — Jun 2021 – Mar 2022

- Gained autonomy in building internal and external dashboard components.
- Contributed to architectural improvements using Vue.js.
- Managed Firebase configurations, including security rules and access permissions.
- Actively contributed to the evolution of the company's design system, promoting visual consistency and accessibility.

Technologies & Tools: Vue.js | Firebase | JavaScript | Jest | HTML | CSS | Accessibility | Design System | Automated Testing | Security Rules

Front-End Development Intern

Stilingue, Ouro Preto, Brazil — Sep 2020 – Jun 2021

- Started working in the Vue.js ecosystem by developing visual components for production applications.
- Worked with componentization, props, events, and lifecycle methods.
- Learned how to build scalable and reusable interfaces, contributing to UI maintenance and evolution.

Technologies & Tools: Vue.js | JavaScript | HTML | CSS | Componentization | Project Structure | Component Communication | Reactivity

Academic Education

Bachelor's Degree in Computer Science, UFOP – Federal University of Ouro Preto, Brazil (Aug 2018 – Apr 2025)
